SUMMARY

Urban Planning and Engineering Enthusiast with Strong Academic Foundation

Possess a robust understanding of urban planning, transportation planning, environmental planning, and urban design, bolstered by extensive coursework and hands-on team projects both within and outside of the academy. Attended nearly all Urban Planning & Engineering courses offered at university, gaining comprehensive knowledge of planning principles, engineering applications, and related programming skills. Highly motivated to apply and expand research skills through practical experience in laboratory and research environments.

EDUCATION

Yonsei University, Seoul, South Korea

Mar 2021 – Aug 2026 (Expected)

Bachelor of Science in Urban Planning and Engineering

GPA: 4.22 / 4.3

- Relevant Coursework: Urban Engineering Capstone Design, Mobility Data Mining, Mobility Analysis and Planning, Smart Urban Transit, Transportation Planning, Smart Urban Design Software Tools, Residential Areas Planning and Studio, National and Regional Planning, Probability and Statistics for Urban Planning, Urban Spatial Information Analysis, R and Python Programming, Urban Planning, Environmental Planning, Urban Form and History, Fundamentals of Urban and Regional Economics, Land and Housing Policy, The Theory of Urban Design, Green City, Engineering Mathematics I-III

University of California, Berkeley, Berkeley, CA

Jan 2025 – May 2025

Exchange student in Urban Studies

- Relevant Coursework: Introduction to Advanced Programming in R, Data Structures, Urban and Community Health, Community Planning and Public Policy for Disability

RESEARCH EXPERIENCE

Student Research Assistant

Apr 2025 – Aug 2025

California Partners for Advanced Transportation Technology (PATH), University of California, Berkeley, CA

- Contributed to Project 3: Personal Mobility on I-680 Corridor Demonstration under the CCTA Automated Driving Systems (ADS) program, focusing on evaluating automated vehicle performance in mixed traffic conditions.
- Analyzed vehicle trajectory and GPS data to assess safety performance metrics such as Time-to-Collision (TTC).
- Supported data processing pipelines using Python and assisted in designing visualizations to identify lane change patterns.

Urban Regeneration Company Intern

Jun 2024 – Aug 2024

Renovaring Korea, Seoul, South Korea

- Assisted with a Ministry of the Interior and Safety-supported project in South Korea ("Gohyang Ole - Retiree Community Village"), focused on rebranding rural villages in Jeju Island facing extinction due to population aging despite their rich local resources. Stayed a week in the village to build rapport with residents, assisted in designing and operating pilot programs aimed at guiding the village's transformation and attracting retirees to settle there. Conducted interviews with participants after program implementation to improve regional revitalization initiatives.
- Supported a local government project (Seodaemun District Office in Seoul) to revitalize two neighborhoods (Sinchon and Ewha) that experienced economic decline after COVID-19. Assisted in developing an educational program for aspiring young entrepreneurs (Seoul Creator School) and supported event operations.

Research Intern

Aug 2023

Professor Min Goo Lee Lab, Yonsei University College of Medicine, Department of Pharmacology Seoul, South Korea

- Assisted in pharmacogenomics research on drug transporters for Cystic Fibrosis treatment under Professor Min Goo Lee. Conducted western blot experiments, cell culture, and gained foundational knowledge in pharmaceutical research. Developed an understanding of drug transport mechanisms and research processes.

SKILLS

Technical Skills

- **Programming:** Python, Java, R, Google Earth Engine
- **Design Tools:** QGIS, AutoCAD, Illustrator, Photoshop, SketchUp, Rhino 3D, InDesign, Adobe Premiere Pro

PROJECTS

Undergraduate Team Projects *Yonsei University, Seoul, South Korea*

Development of Accessibility Evaluation Indicators for Elderly Target Facilities and Analysis of DRT Suitability Using IPA Matrix: Focused on Northern Gyeonggi Province in a Super-Aged Society Fall 2024

- Identified the lack of accessibility evaluation indicators tailored for the elderly and developed a specialized framework. Analyzed areas with insufficient accessibility to medical facilities for the elderly in Northern Gyeonggi Province, highlighting regions requiring DRT services.
- Utilized Python for dynamic web crawling, IPA matrix for prioritization, and QGIS for spatial analysis. Created presentation panels using Photoshop and Illustrator.

Proposal for Mobility Solutions on Yonsei Campus Fall 2023

- Identified campus mobility challenges, proposed a paid mobility service, and conducted a stated preference survey using SAS orthogonal design. Estimated parameters using R's logit model analysis.

Evaluation of Public Housing Policy for the Elderly in Korea Fall 2023

- Investigated urban issues in Seoul, focusing on housing policies for the elderly and their mobility rights; produced a video outlining findings and solutions.

Residential Complex Design for Yongsan, Seobinggo Apartment Site Fall 2023

- Conducted site analysis and resident interviews, developed residential design concepts, and created 3D models and presentation panels using AutoCAD, Photoshop, Illustrator, and Rhino.

Revitalization Plan for Underutilized Spaces on Yonsei Sinchon Campus Fall 2023

- Observed campus areas, analyzed pedestrian patterns with Excel, and proposed activation strategies supported by 3D modeling.

Shuttle Bus Route Proposal for Yonsei Sinchon Campus Spring 2023

- Designed new routes based on survey data and performed B/C analysis to optimize shuttle bus operations.

Environmental Impact Assessment and Solutions for Abandoned Mines Spring 2023

- Conducted a case study on pollution caused by abandoned mines in Korea and proposed mitigation strategies.

New Night Bus Route Proposal Using Taxi O/D Data in Seoul Fall 2022

- Conducted spatial analysis using QGIS, R, and Excel to identify underserved areas and propose new bus routes for late-night transportation.

Analysis and Activation Proposal for Underutilized Areas on Yonsei International Campus Fall 2022

- Identified underutilized areas, proposed activation strategies, and created presentation panels using AutoCAD, Photoshop, and Illustrator.

HONORS AND AWARDS

Korea National Science & Technology Scholarship Fall 2024

- Full tuition scholarship for two years

Korea-U.S. Advanced Field Youth Exchange Support Program Scholarship Fall 2024

- Selected for a prestigious Korea-US youth exchange program fostering collaboration in advanced industries.

Korean Society of Transportation Award Fall 2024

KAIT (Korea Association for ICT Promotion) Award Fall 2024

- National data analysis competition (Participation in the Origin-Destination Data Analysis Category)

Highest honors or honors Spring 2022 – Spring 2023

Yonsei University, Department of Urban Planning and Engineering, Seoul, South Korea
