## SUMMARY

---

### Urban Planning and Engineering Enthusiast with Strong Academic Foundation

Possess a robust understanding of urban planning, transportation planning, environmental planning, and urban design, bolstered by extensive coursework and hands-on team projects both within and outside of academia. Attended nearly all Urban Planning & Engineering courses offered at university, gaining comprehensive knowledge of planning principles, engineering applications, and related programming skills. Highly motivated to apply and expand research skills through practical experience in laboratory and research environments.

## EDUCATION

---

### Yonsei University, South Korea

Mar 2021 – Feb 2026 (Expected)

*Bachelor of Science in Urban Planning and Engineering*

GPA: 4.22 / 4.3

- Relevant Courses: Urban Engineering Capstone Design, Mobility Data Mining, Mobility Analysis and Planning, Smart Urban Transit, Transportation Planning, Smart Urban Design Software Tools, Residential Areas Planning and Studio, National and Regional Planning, Probability and Statistics for Urban Planning, Urban Spatial Information Analysis, R and Python Programming, Urban Planning, Environmental Planning, Urban Form and History, Fundamentals of Urban and Regional Economics, Land and Housing Policy, The Theory of Urban Design, Green City, Engineering Mathematics I-III

### University of California, Berkeley

Jan 2025 – May 2025

*Exchange student as Urban Studies Major*

## RESEARCH EXPERIENCE

---

### Urban Regeneration Company Intern

Jun 2024 – Aug 2024

*Renovating Korea*

- Assisted with a Ministry of the Interior and Safety-supported project in South Korea ("Gohyang Ole - Retiree Community Village"), focused on rebranding rural villages in Jeju Island facing extinction due to population aging despite their rich local resources. Stayed a week in the village to build rapport with residents, assisted in designing and operating pilot programs aimed at guiding the village's transformation and attracting retirees to settle there. Conducted interviews with participants after program implementation to improve regional revitalization initiatives.
- Supported a local government project (Seodaemun District Office in Seoul) to revitalize two neighborhoods (Sinchon and Ewha) that experienced economic decline after COVID-19. Assisted in developing an educational program for aspiring young entrepreneurs (Seoul Creator School) and supported event operations.

### Research Intern

Aug 2023

*Professor Min Goo Lee Lab, Yonsei University College of Medicine, Department of Pharmacology Seoul, Korea*

- Assisted in pharmacogenomics research on drug transporters for Cystic Fibrosis treatment under Professor Min Goo Lee. Conducted Western blot experiments, cell culture, and gained foundational knowledge in pharmaceutical research. Developed an understanding of drug transport mechanisms and research processes.

## SKILLS

---

### Technical Skills

- **Programming:** Python, R, Google Earth Engine

- **Design Tools:** AutoCAD, Adobe Illustrator, Photoshop, SketchUp, Rhino 3D, InDesign, Adobe Premiere Pro

## HONORS AND AWARDS

---

### **Korea National Science & Technology Scholarship**

- Full-Tuition Scholarship for Two Years of University

### **Korea-U.S. Advanced Field Youth Exchange Support Program Scholarship**

Fall 2024

- Hosted by the Korea Institute for Advancement of Technology (KIAT)
- Selected for a prestigious youth exchange program designed to foster collaboration and knowledge exchange in advanced industries between Korea and the United States.
- Awarded a full scholarship to support participation in the program, which includes academic and industry exposure to cutting-edge technologies and practices.

### **President of the Korean Society of Transportation Award**

Fall 2024

- Graduation Research Poster
- Awarded Poster: “Development of Accessibility Evaluation Indicators for Elderly Target Facilities and Analysis of DRT Suitability Using IPA Matrix: Focused on Northern Gyeonggi Province in a Super-Aged Society”

### **President of the KAIT (Korea Association for ICT Promotion) Award**

Fall 2024

- 2024 Big Contest: National Data Analysis Competition for the General Public (Participation in the Origin-Destination Data Analysis Category)
- KAIT (Korea Association for ICT Promotion) and KBD (Korea Bigdata Forum) Hosted

### **Highest Honors**

Spring 2023, Fall 2022

Department of Urban Planning and Engineering  
Yonsei University, Seoul, Republic of Korea

### **Honors**

Spring 2022

Department of Urban Planning and Engineering  
Yonsei University, Seoul, Republic of Korea

## PROJECTS

---

### **Undergraduate Team Projects** *Yonsei University*

#### **Development of Accessibility Evaluation Indicators for Elderly Target Facilities and Analysis of DRT Suitability Using IPA Matrix: Focused on Northern Gyeonggi Province in a Super-Aged Society**

Fall 2024

- Identified the lack of accessibility evaluation indicators tailored for the elderly and developed a specialized framework. Analyzed areas with insufficient accessibility to medical facilities for the elderly in Northern Gyeonggi Province, highlighting regions requiring DRT services.
- Utilized Python for dynamic web crawling, IPA matrix for prioritization, and QGIS for spatial analysis. Created presentation panels using Photoshop and Illustrator.

#### **Proposal for Mobility Solutions on Yonsei Campus**

Fall 2023

- Identified campus mobility challenges, proposed a paid mobility service, and conducted a stated preference survey using SAS orthogonal design. Estimated parameters using R's logit model analysis.

#### **Evaluation of Public Housing Policy for the Elderly in Korea**

Fall 2023

- Investigated urban issues in Seoul, focusing on housing policies for the elderly and their mobility rights; produced a video outlining findings and solutions.
